

# OBSERVATIONS

Intelex's Observations software allows anyone in your workforce to quickly and accurately record and submit observations regarding behaviors, activities or situations that they encounter during day-to-day work. By lowering the reporting barrier for observation, you will increase awareness and visibility into real risk levels at your organization and ensure that all employees are working with safety top of mind.

**HEALTH &  
SAFETY**

## WITH OBSERVATIONS:

### **Get instant observation reporting.**

Our mobile approach to observations means any employee can easily record an observation of note on the spot as opposed to finding a desktop at the end of the day.

### **Increase daily risk visibility.**

While you may have an idea of the risk levels associated with jobs or projects, ascertaining daily risk levels means understanding general working conditions. The Observations application does just that.

### **Tailor observation forms that match your needs.**

As opposed to 'unsafe act' or another generic category, configure your observation form to conform to your operations by specifying certain locations, work types and observation types.

### **Ensure unsafe observations are addressed.**

Assign a follow-up action to an observation such as 'Discuss at next toolbox talk' right from a mobile device.

# OBSERVATIONS

Intelex's Observations software is designed to lower or eliminate the barriers to recording and reporting observations within your organization.

**Decide the details** - Observation forms can simply capture an observation or can be built to capture task being performed, tool being used, PPE being worn, location of work and anything else the user desires.

**Analyze observation trends** - Is there an increase in observations at a certain facility? Is a certain type of PPE showing up at a high frequency? Analyze information to garner a better understanding on what's really happenings and get ahead of problems.

**Intelligent workflows** - If the observation is deemed high-risk, Intelex can automatically trigger a near miss report so that the hazardous condition can be immediately addressed.

**Designed for maximum utility** - Using Intelex mobile and easy-to-use forms, the Observations software is designed for maximum user adoption, promoting a positive safety culture.

The Observations application promotes participation in the safety management process. Beyond hazardous observation, employees may also record safe observations to give deserved credit to responsible coworkers.

## Why Intelex?

### Enterprise Grade Platform

Experience Intelex's powerful platform including advanced security and privacy measures, global localization and data residency support, user-friendly configurability and open APIs to integrate seamlessly with your existing enterprise investments.

### Mobile First Approach

Leverage mobile applications to simplify data gathering, connect and engage workers in real time and easily create, deploy and update action plans from any location and on any device, even offline, for maximized results.

### Partner of Choice

With an extensive breadth of capabilities, diverse partner ecosystem and global footprint, Intelex is trusted by almost half of the top 20 Fortune 500 companies to manage their Health & Safety, Environmental & Sustainability and Quality & Supplier management programs.

# INTELEX

With almost 30 years of EHSQ experience, we know a thing or two about how safety, quality and sustainability can preserve lives and protect the planet. And we know you need to drive productivity and operation excellence, too.
