

# Why our clients chose EcoOnline EHS

**“** The future of COSHH and Operational Safety Management. Our confidence in EcoOnline grew very quickly, we were supported and guided throughout the installation process. The rewards of using both friendly and fit for purpose systems are great; our end users are very happy. **”**

**Mark,  
United Lincolnshire  
Hospital Trust, NHS**

## Solution Modules:

Chemical Reporting

Chemical Substitution

Employee Right To Know

“

I chose EcoOnline due to their understanding of the problems UKBC faced when it came to incident reporting.

The clean and user friendly functionality stood out and the process from initial enquiry through to sale was really well managed.

”

**Jamie Altimimi,**  
Head of Health  
and Safety

## Solution Modules:

EcoOnline EHS

Incident Management

Audit Management

Document Management

“EcoOnline has been a really efficient system to set up. Everybody I have spoken to at EcoOnline has been really friendly and swift with their responses to any questions or issues that we may have had. The training was easy to set up and it was very well received by all staff at Valeport - the software itself only got positive feedback about its ease of use and simplicity (but effectiveness). I look forward to getting in to the full swing of using our EcoOnline system as it will become a very good tool for the company to have.”

**Amelia Wakeham,**  
Compliance Coordinator

Employee Right To Know

“

QR codes are displayed in safe areas which allows anyone to report a near miss or hazard identification through the Swift system, directly onto EcoOnline EHS through their smart phones.

Feedback from employees is that the solution is simple and allows for easy reporting and since implementing Swift, near miss and hazard identification reporting has increased by over 50% (vs. same period in 2019) and is being rolled out across other areas of the GKN Wheels & Structures business.

”

**Andy Jones,**  
HSE Coordinator

“

After seeing a live demo of EcoOnline EHS, we realised it was a great fit for our global organisation. The intuitive nature and the multi-lingual functionality of the database were key components to partnering with EcoOnline. The real-time custom dashboard, charts, and mobile app capabilities are truly remarkable. The new advancements and technological features that are coming soon will further enhance our reporting capabilities. We are excited about this new partnership and the prospects of future advancements.

”

**Joel Johnson,**  
Global Safety Specialist

## PURMO GROUP

“

We chose EcoOnline EHS because of its unrivalled ease of use and configurability. It is also something that we can make available for many employees in different parts of the organisation, thus growing the awareness of EHS topics within our company. Because of its scalability, we expect EcoOnline EHS to serve us well also with our growth targets in mind.

”

**Rolf Guth,**  
HSE & Operational  
Risk Manager

Audit Management

“

We chose EcoOnline because of their experience of providing excellent EHS software solutions, coupled with the fact that EcoOnline EHS scored highly in terms of ease of use, which is a key in ensuring a high take-up rate among our staff. EcoOnline EHS' ability to work in a number of languages (as we operate 45 terminals in 5 countries) and the ease of updates via the cloud was extremely appealing.

”

**Chris Platt,**  
Head of Terminals

## **Stobart** Group

“

Our key area of focus during the tender process was ensuring that we selected a system that gave us visibility of key risk areas and our performance in addressing these risks as well as identify emerging EHS trends to be able to act proactively rather than reactively. We are confident that EcoOnline EHS will give our divisions the EHS visibility they require.

”
