

## Canine Allergic Skin Disease

**Ronald Corbee:** Key points in diagnosing and managing AFR and Atopy

**Becky Mullis:** Nutritional Management of atopic dermatitis and food Allergies

13.10hrs on Thursday 25th March

Followed by live Q & A at approx. 13.55 hrs

**Dr. Ronald Jan Corbee,  
DVM, PhD, Dipl. ECVCN**

Ronald Jan Corbee graduated vet school at Utrecht University the Netherlands in 2003. He has worked in private practice as employee and owner for more than 10 years. He is a board certified nutritionist since 2011, and got his PhD in 2014 on the effects of nutrition on skeletal diseases in dogs and cats. Currently, he is an assistant-professor at the Faculty of Veterinary Medicine, Utrecht University, the Netherlands.

### Key learning objectives:

- The importance of first ruling out adverse food reactions
- Nutrition and its role in managing other skin diseases
- Awareness of secondary infections
- Considering delayed type hypersensitivity when there is a relapse
- Nutritional management of both atopic dermatitis and food allergies and how nutrition can provide a benefit to your patients

**Dr. Becky Mullis, DVM,  
DACVN**

Dr. Mullis received her DVM from the University of Tennessee in 2010. She then completed a private practice small animal rotating internship. After working as an emergency clinician for 2 years, she returned to the University of Tennessee where she completed a residency in veterinary nutrition. She became a diplomate in the American College of Veterinary Nutrition in 2016. Dr. Mullis is currently the Associate Manager of Scientific Insights at Hill's Pet Nutrition and holds an adjunct faculty position at Kansas State University, College of Veterinary Medicine.
