BSAVA
BRITISH SMALL ANIMAL VETERINARY ASSOCIATION

CONGRESS DEMAND

We are delighted to be bringing you 'Congress On Demand' – our brand new training activity that delivers Congress 2020 to you, at your convenience. Our online packages have been developed to bring you as much CPD as possible, replacing much of what would have been available at Congress this April.

Many of our presenters scheduled for Congress have been busy recording their sessions providing more than 100 sessions of planned Congress lectures available to access at affordable prices, with both Vet and Nurse content, covering a vast range of topics. Free content will also be available so you can try before you buy.

The majority of the content is already uploaded, ready to view and we shall be adding more in the coming weeks. The full programme is detailed in the following pages.

Different packages are available and BSAVA members will receive a discounted rate. You can purchase:

- Full access for all of Congress on Demand
- The Veterinary Nurse package will allow access to the nurses content on the last two pages, any open to all recordings as well as free content
- Individual lectures can also be purchased

For information on the packages available and to access Congress On Demand please visit **www.bsavalibrary.com/congressondemand**.

(The programme is subject to amendment)
